

Raaz

Backend Software Engineer — Node.js — Distributed Systems — API Infrastructure

9605633156 raazraz621@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

Technical Skills

Languages: JavaScript (Node.js), TypeScript, Python

Backend Engineering: Node.js, Express.js, REST API Design, Authentication Systems, JWT, OAuth2

Databases: MongoDB, PostgreSQL, Redis (Caching, Rate Limiting)

Infrastructure & DevOps: Docker, AWS EC2, CI/CD Pipelines, Render, Vercel

Tools: Swagger/OpenAPI, Postman, Git, GitHub

Concepts: Clean Architecture, Microservices Fundamentals, System Design, API Security, Transactions, Indexing

Projects

Token Rewards Backend Platform (RZV)

[GitHub Repo](#)

Node.js, Express, MongoDB, Redis, Docker, Render

2025

- Designed and developed a production-style backend platform supporting token wallets, reward distribution, and referral systems.
- Implemented secure authentication using JWT access tokens with refresh token rotation and HTTP-only cookies.
- Integrated Redis caching and distributed rate limiting to improve performance and protect APIs from brute-force and abuse attacks.
- Built admin dashboard APIs enabling user management, wallet adjustments, system monitoring, and audit logging.
- Structured backend architecture with modular services to support future microservice extraction.
- Documented REST APIs using Swagger/OpenAPI and validated workflows using Postman collections.
- Containerized services using Docker and deployed backend infrastructure on AWS EC2.
- **Live Demo:** [Admin Dashboard](#) **Backend API:** [API Endpoint](#)

Experience

Freelance Software Developer

Jun 2025 – Present

Self-Employed

Remote

- Developed backend APIs and full-stack solutions for small businesses and independent clients.
- Deployed production applications using cloud platforms including Render and Vercel.
- Implemented authentication systems, secure APIs, and scalable backend integrations.

Mobile Application Developer

Nov 2024 – Jun 2025

White Matrix

India

- Developed and maintained cross-platform mobile applications deployed to Google Play Store and Apple App Store.
- Integrated mobile applications with backend REST APIs and authentication services.
- Collaborated with backend teams on database schemas and API data structures using PostgreSQL.

Education

Bachelor's Degree in Computer Science

2021 – 2025

University Graduate

India
